

# What differentiates PodM2M?

With vast experience in helping companies develop resilient, future-proof M2M/IoT solutions, PodM2M is the expert in IoT connectivity and innovation. Offering a full range of services via a centralised platform, we help companies get quickly to market.

## Experience

- One of the longest running M2M MVNOs, we have been dedicated to M2M since 1999.
- As a connectivity expert, we are an IoT enabler, we don't sell end-to-end solutions that would compete with our customers.
- **Pod Group** researches and develops customised solutions to resolve complex connectivity issues.

## Scope

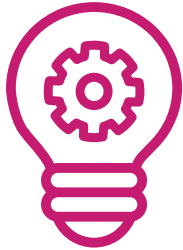

- Global offices in the UK, Spain and the USA. 9 languages spoken across the company.
- Our solutions are available worldwide with coverage in 185 countries.
- One global multi-network SIM, manufactured by us and owned by our customers.

## Agnostic

- Cellular and LPWAN connectivity options available via a centralised platform.
- Native single network solutions in select countries, including CDMA, GSM, 3G, 4G/LTE and RPMA.
- Multiple countries and networks available on one SIM, with one APN, controlled by one platform.

## Innovation

- Development of **customised platforms and software** giving users complete control over their connectivity.
- 50% of staff are **software developers and network engineers** working full time on R&D.
- **Multi-IMSI** (International Mobile Subscriber Identity) solution, was awarded EU innovation grant for development.

## Control

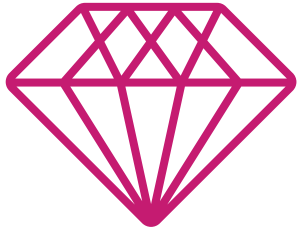

- **Multi-IMSI** option allows customised SIM profiles to be created and controlled centrally.
- **F2M Platform** controls every aspect of the SIM: network, real time usage, limits, alerts.
- **Mobile app** allows management of SIMs on the move.

## Flexibility

- **Flexible data packages** to meet your exact requirements with no hidden costs.
- **No terms and contracts** on most connectivity options. No big commitments or upfront investments.
- Quick and **simple onboarding process**, only one click required to accept our online Terms and Conditions.

## Resilience

- **Best signal, multi-network SIMs** with no HLR steering that automatically switch network if signal is lost while roaming.
- Fully **georedundant** network with diameter control and the option of Fixed IPsec VPN for added security.
- Our multi-IMSI solution provides a backup IMSI on a separate network infrastructure with **No Single Point of Failure** for mission critical applications.

## Customer service and support

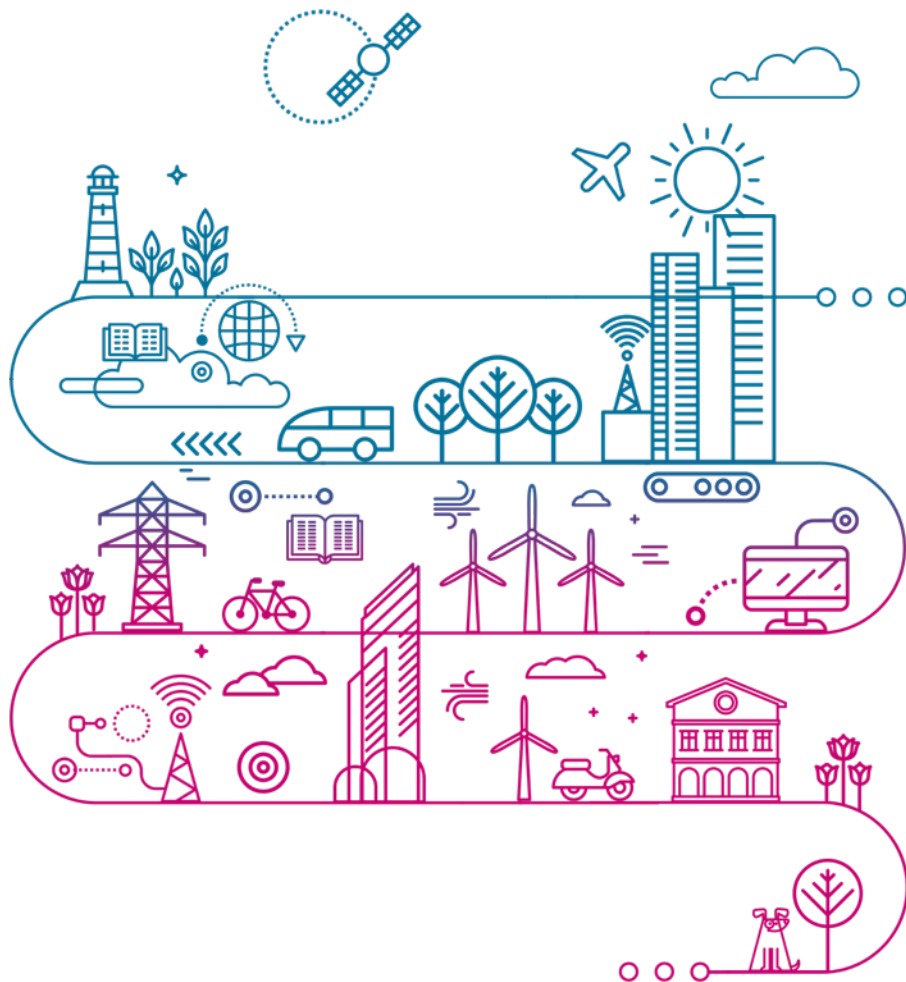

- 20 hours of continuous account management daily and **free 24/7 emergency support**.
- **Advice from IoT experts** on all aspects of your solution: hardware, firmware, software and connectivity.
- We happily work with **companies of all sizes**. We grow with companies as they evolve.
