

Whitelabel Platform Spec Sheet

'Own' Your Customers. Customized Interface. Full Account Authority.

Pod's Whitelabel Platform is the ultimate tool to pass on the benefits of our flexible connectivity and centralized platform to your customers. Create a fully customized interface for your customers, branded with your corporate identity, built on your URL, and incorporated with your existing platform should you wish it. Our platforms also give you access to our API, enabling you to build apps linked to our platform on top of your current services.

Manage your entire SIM base, including those assigned to customers, from your Admin Dashboard, create User accounts to delegate finance or support tasks, get billing reports for your customers and your own costs, and manage sub-accounts with all the functionality of our **FreedoM-2-Manage platform.**

With Pod's Whitelabel Platform you can truly 'own' the customer from end to end, providing connectivity and management software as part of your own solution.

Customer Benefits

Fully customize your customers' interface, brand it with your corporate identity, URL and pricing, and use our API to add features to your existing platform.

Diagnose issues with all SIMs under you, including your customers', access our Q&A knowledge base and instant troubleshooting, and pass the support of Pod's IoT experts on to your customers using your own 'sent from' support email.

Access comprehensive Analytics modules covering a wide range of criteria, and, in future releases, design your own graphs and tables and assign custom-built modules to specific customers.

Offer connectivity as part of your solution, generate billing reports and offer your own Subscription packages, to 'own' the customer from manufacturing to account management.

Own the Customer

by offering connectivity alongside your application, and providing a fully branded, customizable platform to consolidate your solution.

Intuitive Interface

to give you and your customers the most control, in the simplest way possible. Grant predefined access to User roles such as Support, Finance, Read-Only and Admin, and in future releases control your users' permissions as well.

Experienced Support

from Pod, branded as your own. Get 24/7 specialist support for your issues, and set a 'sent from' email to receive your customers' support tickets yourself.

Get Billing Reports

for you and your customers, which can be passed on under your branding, for a complete user experience for everyone involved.

Not what you were looking for?

FreedoM-2-Manage, our SIM and account management platform, gives you an all-encompassing insight into your SIMs, including the recently added Analytics and Diagnostics modules. The mobile app, F2M Alerts, is a compact version of **FreedoM-2-Manage** that enables you to control your SIM base on the go.
